

Martin Goodson's Speaker Profile

Martin Goodson is a vastly experienced machine learning expert who regularly speaks about data science, AI and financial services at leading events and conferences around the globe.

Speaker Biography

Dr Martin Goodson is Chief Scientist and CEO of Evolution AI, and a specialist in machine reading technologies. He is the Chair of the Royal Statistical Society Data Science Section, the main professional body for data science in the UK. He also runs the largest machine learning community in Europe, London Machine Learning Meetup. Martin's work has been covered in the Economist, Quartz, Business Insider and TechCrunch.

Topics

1. Successful Deployment of AI in an Enterprise Environment.

Martin is the Project Director of one of the largest industrial AI projects funded by the UK Government. The AI built through the project is deployed at Dun & Bradstreet and completely automates the extraction of data from financial statements.

2. Mastering Machine Learning.

Martin is well equipped to speak on any aspect of machine learning, from classifying genomic variation at the University of Oxford to over a decade of experience implementing commercial projects.

3. AI, Financial Services and Compliance.

Evolution AI deploys artificial intelligence in financial services. Martin's experience brings the issues of compliance, explainability and ethics to life.

4. Delivering Data Science Projects.

As chair of the RSS Data Science Section and Evolution AI's Chief Scientist, Martin is eminently qualified to speak on all facets of the world of data science from industry applications to the latest academic insights.

5. AI Can Catch Criminals.

Martin has led the creation of NLP solutions to help stop financial crime. The solutions are designed to automate much of the KYC process at the two major UK banks.
